Documents are only available in English.	Our documents are available in several languages, among them English, Spanish, etc. We sell documentation toolkits for various ISO standards and regulations in more than 100 countries around the world.
Documentation is a jumble of in-depth policies and procedures that were created for large companies.	Our documents were designed especially for small to mid-sized companies. This means we don't include anything you don't need, and each document is shorter and simple to understand.
Other providers only offer the toolkit – no guidance of any kind.	We provide four different services that are included in the price of the toolkit: (1) a professional consultation via phone or Zoom, (2) review of your finalized documentation, (3) unlimited email support, and (4) pre-audit check.

“We’ll just use the templates that we found on the internet.”

Unfortunately, these only cover about 20% of the documents, with no guidance.

Our templates comprise 100% of the documents required by the standard or regulation, with guidance on how to complete them.
