1. Purpose, scope and users

The purpose of this procedure is to ensure control over creation, approval, distribution, usage, updates, retention, and disposition of documents and records (also called: documented information) used in the QMS (*Quality Management System*).

This procedure is applied to all documents and records related to the QMS, regardless of whether the documents and records were created inside [organization name] or whether they are of external origin. This procedure encompasses all documents and records, stored in any possible medium – paper, audio, video, etc.

This procedure doesn't apply to documents and records regarding [describe the parts of organization that this procedure doesn't apply to].

Users of this document are all employees of [organization name] inside the scope of the QMS.

Commented [9A5]: E.g. Finance, accounting, general and legal affairs.

2. Reference documents

- ISO 9001:2015, clause 7.5
- Quality Manual
- Scope of Quality Management System
- [other documents and regulations specifying document control]

3. Control of documents

Internal documents are all documents created inside the organization, e.g. policies, working instructions, records etc., and are listed on the List of Types of Records.

3.1. Creation and identification of documents

All documents are identified by name, code, date of version, version number and copy number.

Identification of documents is performed as follows:

- Procedures are coded in the following way: [describe the organization's standard practice].
- Records are coded in the following way: [describe the organization's standard practice].

The documents within the scope of the QMS are formatted in the same way as this document.

3.2. Document approval

All documents, regardless of whether they are new documents or new versions of existing documents, record templates and working instructions must be reviewed and approved by [job title]

Commented [9A6]: For example:

Procedures are coded with four alphanumerical characters: PR.XX

The coding is as follows:

- PR – Letter marking of type of document – e.g. PR stands for procedure
- XX – Numerical marking – ordinal number of procedure in ascending order

Commented [9A7]: For example:

Records are coded with five alphanumerical characters: PR.XX.Y

The coding is as follows:

- PR – Letter marking of document – procedure
- XX – Numerical marking – ordinal number of procedure in ascending order in List of documents
- Y – Numerical marking – ordinal number of record in ascending order in List of Type of Records

In this way, the record is directly connected to the procedure it refers to.

Commented [9A8]: In case there are several document levels, for example policies - procedures - instructions, which must be approved by different management levels, such requirements should all be specified.

Commented [9A9]: Alternatively, if using electronic documents, you can

3.3. Publishing, distributing and accessing documents

After approving a draft or a new version of a document, [job title] keeps the original version and [job title] distributes the numbered copy to the place of use. Persons named in the distribution list verify receipt of the document.

The Quality Policy is the only document

Commented [9A10]: If using electronic documents you can write something like this: "[job title] must publish the documents after the approval on the intranet, in the folder [folder name] with reading rights only."

3.4. Withdrawal of outdated documents

The new version of a document is immediately distributed to the place of use upon creation and approval (as explained in the previous clause) accompanied with withdrawal of the outdated document. After replacing, the outdated document is destroyed or labeled "Replaced by version no. ___" if it is intended to be archived as a reference.

Commented [9A11]: If using electronic documents, write something like this "If there is an older version of the document, [job title] must delete it from the valid documents folder and move it to [folder name]"

3.5. Document updates and changes

The person listed as document owner has the responsibility for updating and changing the document. Updates and review are performed in line with the frequency defined in the List of Internal Documents.

All changes to the document must be made using

Commented [9A12]: Delete if you use electronic documents.

3.6. Documents of external origin

Each external document that is necessary for the planning and operation of the QMS must be recorded in the incoming mail register. The incoming mail register must contain the following information: (1) document number, (2) sender, (3) document name, (4) date of receipt, and (5) name of the person to whom the document has been forwarded.

Commented [9A13]: Adapt the document name to the organization's existing record maintenance system.

Commented [9A14]: Add additional information if required by the organization's record maintenance system.

[organization name]

3.7. Records control

3.7.1. Record managing and labeling

Each internal document in the QMS must define how records resulting from the use of such a document should be managed; i.e., it must specify the following: (1) record name, (2) storage location, (3) person responsible for storage, (4) controls for record protection, and (5) retention time.

Records that arise from legal or regulatory requirements or from IT systems are accepted in defined form and they are not subjected to marking described in this procedure.

3.7.2. Record availability and retrieval

Employees of the organization may access stored records only after obtaining permission from the person designated as the person responsible for storing individual records. If the sensitivity of certain records is such that permission for access must be obtained from a different person, this must be stated in the concerned internal document in the chapter describing records control.

Access and retrieval rights for records are

3.7.3. Record archiving and destroying

Records with expired retention times are destroyed in a way that prevents their further use and the date of destruction is entered into Registry of Records for Detention/Central Archive.

4. Managing records kept on the basis of this document

Record name	Code	Storage			Responsibility
		Retention time	Location	Protection	
List of Internal documents	PR.00.1	Older versions are archived for 3 years	[office of [job title]]	Records are stored in file cabinet [describe name/location]	[job title]

Commented [9A15]: If you want to find out more about record control, see: Some tips to make Control of Records more useful for your QMS
<http://advisera.com/9001academy/blog/2014/01/28/tips-make-control-records-useful-qms/>

Commented [9A16]: More details should be provided if records are stored on various media.

Commented [9A17]: E.g. once a day.

Commented [9A19]: Adapt the information in this column to the normal practice in your company.

Commented [9A18]: Adapt the information in this column to the normal practice in your company.

Commented [9A20]: If the record is in electronic form, write the name of the folder on [job title]'s computer.

[organization name]

List of External Documents	PR.00.2	Older versions are archived for 3 years	[office of [job title]]	Records are stored in file cabinet [describe name/location]	[job title]
List of Type of Records	PR.00.3	Older versions are archived for 3 years	[office of [job title]]	Records are stored in file cabinet [describe name/location]	[job title]
Registry of Records for Detention/Central Archive	PR.00.4	Older versions are archived for 3 years	[office of [job title]]	Records are stored in file cabinet [describe name/location]	[job title]
Incoming mail register (electronic form – Excel spreadsheet)		3 years	[in the computer of owner of document]	Only [job title] has the right to make entries into and changes to the incoming mail register.	[job title]

Commented [9A21]: Adapt to the organization's standard practice.

Only [job title] can grant other employees access to the records.
